Housatonic Software Up-Sizes Free Online Viewer for Microsoft Project

Pittsfield, MA - Housatonic Software a pioneer in developing a Microsoft Project “viewer” (www.projectviewercentral.com), and the first to provide a free online viewer, announces an increase in the file size limit for this free service. Project files – MPPs – of virtually any complexity or scale are now supported.

The free online Project Viewer has been used by over a million project professionals to open, view, print and share plans created in Microsoft Project. The web-based service makes it possible for individuals with only an occasional need, or those away from their office resources, to access project plan information with a web browser and internet connection.

Microsoft Project 2010 Compatible

The Housatonic Project Viewer is compatible with Project 2010 as well as all earlier versions of Project.

Always Free and Fully Functional

The Housatonic Project Viewer Online Free is a fully functional viewer offering the same functionality as the Web Server and PC based viewers offered by Housatonic.

More Project Viewers

In addition to the Online Free Viewer, the suite of project viewing solutions offered by Housatonic includes PC and web server viewers, both of which are available for free trials. For more information about the complete line of Housatonic Project Viewers, visit www.projectviewercentral.com.

For more information about Housatonic, visit www.housatonic.com or telephone 413.822.5675.
